

PROFILE

I am a digital media specialist and graduate of SFU's SIAT program. My skills are most prominent in the fields of web and graphic design, video, and 3D modeling, but I'm also comfortable with photography, product design and fabrication methods. I have been active in professional web design for 7 years and I am currently working as a freelancer with a few active projects. With a positive outlook and grasp for collaborative innovation, I am eager to face the world ahead and make the connections that will help me throughout my career.

EXPERIENCE

Work Integrated Learning @ Simon Fraser University

Online Community Host (2010 January - September)

I managed the Online Learning Community for SFU. My weekly tasks required me to format and edit articles for the community in addition to handling the online promotional material for the site. I also had the chance to coordinate several photo and video projects which were used to build up the database of stock images and promotional videos for the community. Throughout my term I was able to help oversee and assist in developing a new community integrating the latest social media trends.

Pacific DVD

Clerk (2007 April - 2011 May)

I worked primarily in customer relations and kept stock of merchandise using a database. It required me to be enthusiastic while giving customers feedback and helped develop my visual ability to recall the placement of our stock. I needed to be able to handle operating a busy store on my own for long hours at a time. My efforts to achieve customer satisfaction have been complimented on by my managers.

Freelance Web Design

(2005 - Present)

I have made myself available to clients for professional HTML-based web and graphic design. I offer graphic and logo design for businesses and am able to create static pages and CSS layouts with ease. Recently I have been learning Wordpress which utilizes dynamic layouts, allowing updates to be performed by administrators.

Digital Film @ Simon Fraser University

(2009 January - 2011 March)

Two of the film projects I co-created for my Moving Images course, a documentary and a music video, have been used by the professor in a student showcase of the course and at the campus open house. My role in the teams was both director and cameraman using a Sony HDR-FX1 camera. A documentary I participated in creating was featured on a website for a local Vancouver convention celebrating animation and video entertainment.

EDUCATION

Bachelor of Arts in Interactive Arts from Simon Fraser University (2006-2011)
